

Isobel Lyall (Cryptozoologist)

Isobel Lyall is the faculty head of cryptozoology at the Scottish Society for Paranormal Research. She joined the society several years after a violent encounter with an elusive supernatural creature, hoping that she could both use her experience with the paranormal to help others and utilise the SSPR's resources to determine what attacked her.

Appearance

Isobel has fair skin, grey eyes, and medium-length brown hair with a fringe. She has two scars across the lower left of her face, resulting from her encounter with the supernatural creature. She typically wears a blouse, a frilled tie-front cardigan, a midi skirt, and laced boots.

Personality

She is a fairly reluctant and secretive person, but is collaborative when necessary and has the best interests of others at heart. She is somewhat disorganised and often becomes absorbed by particular aspects of her work, ending up researching them for longer than necessary.

Skills and Abilities

- Previous training in biology
- Animal identification and tracking
